

Volunteer from Germany

Wet Tropics Communities and Partnerships team also welcomed volunteer staff member, Karen Schmiing, from Germany. We are very fortunate to have Karen on board using her skills to further develop our educational package 'Rainforest Explorer'. Karen's brief message about herself follows.

Hi, my name is Karen Schmiing and I'm a qualified biologist, teacher and freelance environmental writer from Germany. For the next few months I will be volunteering at Wet Tropics mainly working for Partnerships and Communities. My focus will be to research ways in which existing content like the Rainforest Explorer might be presented in a more interactive, engaging and accessible way, particularly for young people.
