

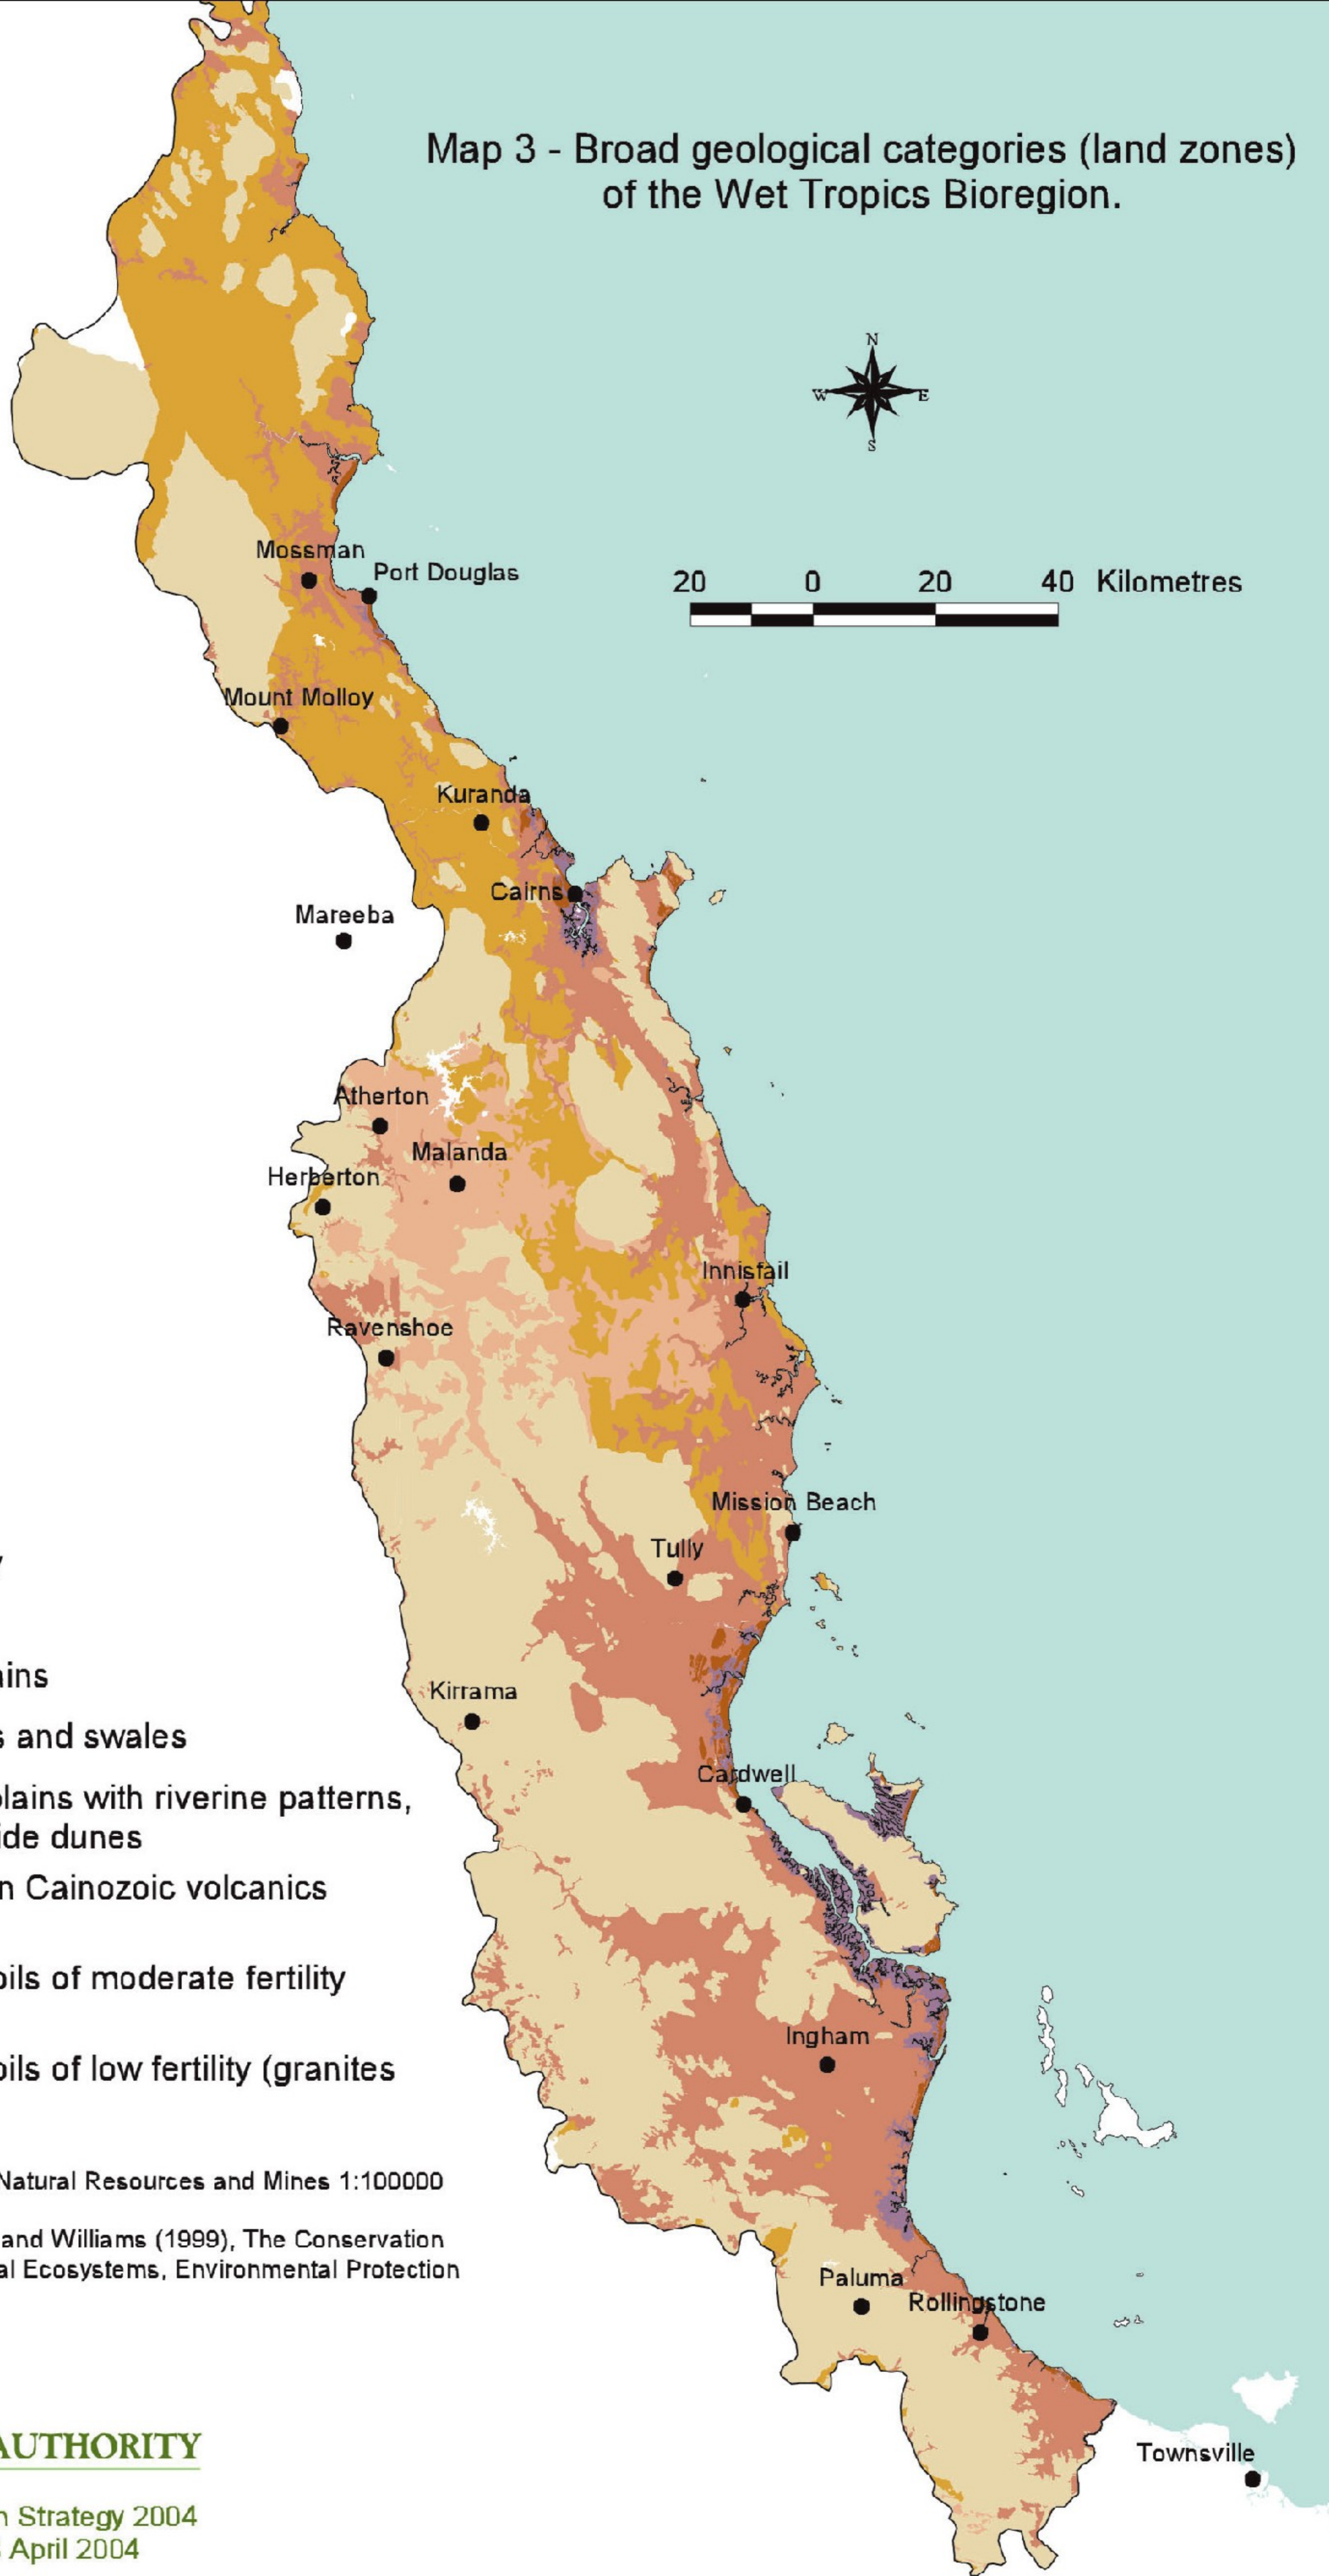

Map 3 - Broad geological categories (land zones) of the Wet Tropics Bioregion.

**Legend**

∩ Bioregion boundary

Land zone:

- Marine tidal clay plains
- Coastal sand dunes and swales
- Near-level alluvial plains with riverine patterns, wetlands and lakeside dunes
- Cones and plains on Cainozoic volcanics (basalts)
- Hills with shallow soils of moderate fertility (metamorphics)
- Hills with shallow soils of low fertility (granites and rhyolites)

Land zone data source:  
 Dataset derived from the Dept of Natural Resources and Mines 1:100000 scale geology mapping.  
 Land zones as depicted in Sattler and Williams (1999), The Conservation Status of Queensland's Bioregional Ecosystems, Environmental Protection Agency, Brisbane.
